Digital Agendas for Open Government

@ Inter-american Development Bank
Washington, DC
April 2014

By Jean Marie ALTEMA
IT Advisor to the Prime Minister and Coordinator of the e-Gov (Haïti)

Email: jeanmarie.altema@primature.gouv.ht
Vision

Bringing the administration closer to the citizens needs though ICT to guarantee efficiency and ensure the quality of service and transparency
The Integrated Platform of the Government of Haiti. The project …

- August 2009: Conceptualization of an ICT platform;
- September 2010: Haïti and IDB sign the New Technologies and Institutional Capacity Building in the Government of Haiti
- Cost: ~ $US 4,600,000
  - $US 3,000,000 by IDB
  - $US ~1.6 millions by Microsoft (software licences)
The Integrated Platform of the Government of Haiti. The solution…
Mission of service

G2C : Government to Citizens
G2B : Government to Businesses
G2G : Government to Government
« ICT have changed the way we see our world and ourselves. They have revolutionised our social and economic relationship. They offer effective methods to the Government to govern and provide the best quality of service to the citizens. »
Why e-Government?

1. Modernize the State;

2. Bring the citizens, businesses closer to the Government by providing services and access to information (in Haïti and the Diaspora);

3. Improve the efficiency of the public administration by simplify the procedures;

4. Foster and promote transparency;

5. Develop the technology sector as an economic activity to create jobs;

6. Rationalize the use of technology in the public administration;

Results-oriented objectives

1. Hosting of ~2000 emails for Ministries and Government Agencies. (Ex. MPCE. Ministry of Tourism. MTPTC. MCI. FAES. CFI. Primature. RNH. APN etc…);

2. Hosting of Databases: Ministry of Planning. Ministry of Education. FAES.

3. Creation and hosting of domains;

4. Webhosting;

5. Data Center infrastructure;

7. Trainings;

8. Videoconference in the Ministries and the Departmental Delegations
Training
Training
Data Center / Equipment
Videoconference
Computer labs in the public schools
A citizen-centered vision

- Tax
- Education
- Businesses
- Death
- Birth
- Identification
- Vehicule
- Social programs
- Vote
- Passport
- Other…
Aims to achieve
1. Infrastructure: improve the weak infrastructure after the earthquake
2. Education and training: train the employees of the public sector;
3. Harmonization of the procedures: Governance

Policy - “a deliberate plan of action to guide decisions and achieve rational outcome(s).”

Issues

Energy;
Internet access;
Education;
Absence of adequate laws and policy;
National plan on ICT (Governance and Management)
Thank you!
