

NAME:

Program for Social-Environmental Recovery of the Serra do Mar and Sistema de Mosaicos of the Mata Atlantica (BR MICI1/2010)

COUNTRY:

Brazil

DATE OF REQUEST:

May 31, 2010

REQUESTER:

The Requester is a local nongovernmental organization called "Mongue Protecao ao Sistema Costeiro".

SYNOPSIS:

The Requester states that disbursement of the loan for the Project would be in contravention of a court decision in the State of Sao Paulo.

Just as Juréira-Itatins Ecological Station suffered prosecution due to management errors, the State Park of Serra do Mar also has a lawsuit for immediate eviction.

This is further evidence of the poor management of the Ministry of Environment of the State of Sao Paulo. The disbursement of funds as proposed in the project Program for Social-Environmental Recovery of the Serra do Mar and Sistema de Mosaicos of the Mata Atlantica Nº BR-L1241 would be an act counter to a court decision imposed by the Judiciary of the State of Sao Paulo.
