

RE: Selection #: RG-T2728-P002  
Selection Method: Single Source Selection  
Sector: Climate Change Adaptation  
Country: Firm hired in the USA (services to be rendered in Costa Rica)  
Financing ATN #: ATN/MC-15636-RG

Description of service:

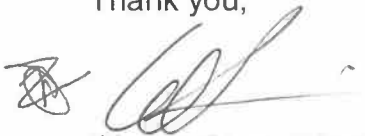

Stantec Consulting will deliver a workshop entitled "Consideration of Extreme Weather and Climate Uncertainty Risks in Planning, Financing and Engineering Infrastructure, Buildings and Facilities" in conjunction with the PPP Americas Conference in San Jose, Costa Rica. The workshop is targeted to infrastructure practitioners and decision-makers who are involved in the planning, financing, design, operation, maintenance and management of infrastructure, facilities and buildings and who, currently and in the future, need to consider climate change risks to ensure their sustainability and resilience.

The workshop builds upon the proven and widely used Engineers Canada's Public Infrastructure Engineering Vulnerability Committee (PIEVC) Protocol, a climate change vulnerability assessment and risk screening tool that can be used to assess planned or existing infrastructure. The Protocol has been applied to a wide spectrum of built structures such as water supply systems, wastewater collection and treatment, stormwater management, roads and bridges, airports, residential and institutional buildings and energy infrastructure.

The aforementioned selection process has been completed and the contract has been awarded as follows:

Firm name: Stantec Consulting Ltd.  
Firm country: Canada  
Contract Value: USD\$11,450  
Date of award/contract date: June 19<sup>th</sup>, 2017

Thank you,

Giovanni Leo Frisari  
Division: Climate Change Division
